

Duplicate Passport

If your passport has been lost, stolen or damaged, you will need to apply for a duplicate passport. Any such passport will be stamped "DUPLICATE" and will state that the equine cannot be slaughtered for human consumption.

(11) *Veterinary Signature*:

Veterinary Stamp:

Important Guidelines for Completion of Application Form and Silhouette

Both the application form and the silhouette must be completed in BLOCK CAPITALS and in ink. Please mark on the diagram with  where the microchip is implanted in the equine. Veterinary Surgeon to sign and stamp the silhouette.

Please indicate the equine's white markings by lightly hatching the full extent of the marking in the appropriate place on the diagram in red ink. Please be as accurate as possible in showing the extent of the markings. It is not sufficient simply to indicate the top edge of a white marking. Please note, in words, details of the white markings (e.g. 'white to mid-cannon' or 'white to below knee') in the boxes provided. If the equine has no white markings, please write 'nil white' or 'no markings'. Flesh markings should be outlined and completely shaded. Take care not to obliterate whorls.

Coloured horses. Piebald horses are those with large irregular patches of black and white and the patches are well defined. Skewbald horses are those with large irregular patches of white and any other colour except black. The patches are well defined. If the horse has a coat with more than two colours it should be described as tri-coloured. Please describe the colours eg "skewbald (chestnut & white)".

Spotted horses. Please describe the base colour and the colour(s) of the spots eg "brown with white spots".

The equine's whorls (changes in the direction of hair growth) should be marked on the diagram with 'X' where appropriate in black ink. If the equine has no other distinguishing marks, please note, in words, the position of the whorls, (e.g. 'whorl mid-crest' or 'whorl at point of stifle') in the boxes provided.

Please indicate on the diagram any acquired marks such as scars with 'V' where appropriate, and describe, in words, these marks in the boxes provided.
